Creating a new torrent

To make a torrent, first move the necessary files or torrents into the TORRENTS folder. Then the icon to create a torrent will appear, click on it.

1. Once the torrent is created, it will be added to the torrent download list and automatically started for seeding.
2. The created torrent will be private
3. Torrent tracker list
4. Comments to giveaway

After successfully hashing all the files, you will see a button to download the .torrent file to your computer. If you have enabled the option "Start seeding" the torrent will appear in the list of torrent distributions.
